Uyga Vazifa: ITINFO Loyihasi uchun CRUD Operatsiyalarini Yozish

Vazifalar Ro'yxati:

- 1. Author va Category jadvallari uchun CRUD operatsiyalarini yozish
- 2. User va Admin kolleksiyalari uchun validatsiya va CRUD operatsiyalarini yozish
- 1. Author va Category jadvallari uchun CRUD operatsiyalari

Author CRUD operatsiyalari:

- Author yaratish
- Author o'qish (barchasi yoki ID bo'yicha)
- Author yangilash
- Author o'chirish

Category CRUD operatsiyalari:

- Category yaratish
- Category o'qish (barchasi yoki ID bo'yicha)
- Category yangilash
- Category o'chirish
- 2. SuperAdmin User va Admin kolleksiyalari uchun validatsiya va CRUD operatsiyalari

User CRUD operatsiyalari:

- User yaratish (SuperAdmin)
- User o'qish (SuperAdmin)
- User yangilash (SuperAdmin)
- User o'chirish (SuperAdmin)

Admin CRUD operatsiyalari:

• Admin yaratish (SuperAdmin)

- Admin o'qish (SuperAdmin)
- Admin yangilash (SuperAdmin)
- Admin o'chirish (SuperAdmin)

API Yo'nalishlari

SuperAdmin:

User CRUD operatsiyalari:

• Foydalanuvchini yaratish:

```
POST localhost:4000/superadmin/user/
Body:
    {
        "email": "user@example.com",
        "password": "strong_password",
        // Boshqa foydalanuvchi xususiyatlari (ismi, roli, h.k.)
}
```

• Foydalanuvchini o'qish:

```
GET localhost:4000/superadmin/user/
```

• Foydalanuvchini yangilash:

```
PUT localhost:4000/superadmin/user/{user_id}
Body:
{
    // Yangilanishi kerak bo'lgan xususiyatlar (masalan, email, parol)
}
```

• Foydalanuvchini o'chirish:

```
DELETE localhost:4000/superadmin/user/{user_id}
```

• Admin yaratish:

```
POST localhost:4000/superadmin/admin/
Body:
{
    "email": "admin@example.com",
    "password": "strong_password",
    // Boshqa admin xususiyatlari
}
```

• Adminni o'chirish:

```
DELETE localhost:4000/superadmin/admin/{admin_id}
```

• Adminni yangilash:

```
PUT localhost:4000/superadmin/admin/{admin_id}
Body:
    {
        // Yangilanishi kerak bo'lgan xususiyatlar
    }
```

Admin:

Category CRUD operatsiyalari:

• Kategoriyani yaratish:

```
POST localhost:4000/admin/category/
Body:
{
    "name": "Category Name",
    // Boshqa kategoriya xususiyatlari (ta'rif, h.k.)
}
```

• Kategoriyani o'qish:

```
GET localhost:4000/admin/category/
```

• Kategoriyani yangilash:

```
PUT localhost:4000/admin/category/{category_id}
Body:
    {
        // Yangilanishi kerak bo'lgan xususiyatlar (masalan, nomi, ta'rifi)
    }
}
```

• Kategoriyani o'chirish:

```
DELETE localhost:4000/admin/category/{category_id}
```

User CRUD operatsiyalari:

• Foydalanuvchini yaratish:

```
POST localhost:4000/admin/user/
Body:
    {
      "email": "user@example.com",
      "password": "strong_password",
      // Boshqa foydalanuvchi xususiyatlari (ismi, roli, h.k.)
}
```

• Foydalanuvchini o'qish:

```
GET localhost:4000/admin/user/
```

• Foydalanuvchini yangilash:

```
PUT localhost:4000/admin/user/{user_id}
Body:
    {
        // Yangilanishi kerak bo'lgan xususiyatlar (masalan, email, parol)
    }
}
```

Admin roli cheklovlari:

• Admin foydalanuvchi va kataloglarni o'chira olmaydi, ammo yaratish va yangilash mumkin.

API Yo'nalishlari uchun kod misollari

```
User routerlari uchun kod (src/routes/userRoutes.js):
**Category routerlari uchun kod (src/routes/categoryRoutes.js`):**
```

Admin rolining foydalanuvchi va kataloglarni o'chira olmasligini ta'minlash uchun middleware yaratish mumkin.

```
Middleware (src/middlewares/roleMiddleware.js):

Routerlarga middleware qo'llash:

Category routerlari uchun middleware (src/routes/categoryRoutes.js):
```

Yakuniy eslatmalar:

- 1. Kod strukturasini va xavfsizlikni ta'minlash uchun middleware dan foydalaning.
- 2. API nuqtalarini sinovdan o'tkazish uchun Postman yoki boshqa vositalardan foydalaning.

Agar qo'shimcha savollar yoki tushunmovchiliklar bo'lsa, marhamat qilib so'rang!
